

JEEL D. KHANT

AI & Software Developer

+91 97250 68008 | jeelkhant600@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

AI-Focused Software Developer with hands-on experience in developing web, AI, and software applications through internships and academic projects. Proficient in Python, Flask, MERN Stack, and Flutter, with a strong foundation in software development and artificial intelligence. Passionate about building AI-powered solutions, solving real-world problems, and contributing to innovative software development teams.

Technical Skills

- **Programming Languages:** Python, JavaScript, SQL
- **AI & Machine Learning:** NumPy, Pandas, Scikit-learn
- **Backend:** Flask, Node.js, Express.js, REST APIs
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS
- **Databases:** MongoDB, MySQL, SQLite
- **Mobile Development:** Flutter
- **Core Concepts:** DSA, OOP
- **Tools:** Git, GitHub, VS Code, Postman

Professional Experience

AI/ML & MERN Stack Intern - TejasKP AI Software

Jan 2026 - Jun 2026

- Developed AI-powered web applications and software solutions using Python, AI, and the MERN stack.
- Built and deployed the AI-based Review Automation System to automate review management, dashboard analytics, and business workflows.
- Delivered multiple client projects from development to production deployment while meeting quality and delivery standards.
- Led the AI/ML domain by mentoring interns, assigning technical tasks, and guiding project development.
- Reviewed daily intern work logs, tracked project progress, and coordinated team activities for timely project delivery.
- Collaborated directly with clients to gather requirements, implement custom features, and provide deployment and post-deployment support.

Software & App Development Intern - Tankar Solutions (Remote)

Oct 2025 - Jan 2026

- Engineered cross-platform mobile applications using Flutter and Dart.
- Built "TrackMyFlight," a Flutter application integrating REST APIs for real-time flight tracking.
- Implemented features across multiple client projects while resolving issues and meeting project deadlines.
- Worked collaboratively with the development team using Git in a remote Agile environment, contributing to testing and feature implementation.
- Participated in the complete software development lifecycle, including implementation, testing, and deployment.

Web Development Intern - InternPe (Remote)

Oct 2023 - Apr 2024

- Implemented responsive web modules using JavaScript, React.js, and REST APIs.
- Integrated backend APIs to streamline data flow between frontend and server.
- Enhanced application performance by improving state management and minimizing unnecessary re-renders.
- Resolved application issues through debugging and structured testing to improve stability.

Projects

PROJEX – AI-Powered Project Collaboration System (React.js, Node.js, Express.js, MongoDB, Python, AI)

- Developed an AI-powered project collaboration platform for students and faculty.
- Implemented role-based authentication, project management, and team collaboration features.
- Built secure REST APIs and MongoDB backend for efficient data management.
- Designed responsive dashboards with AI-assisted project review and progress tracking.

MyReview—AI-Based Review Automation System (Python, Flask, SQLite, HTML, CSS, JavaScript)

- Engineered an AI-powered review automation system for business review management and improved review processing speed by 30%
- Created role-based dashboards for managing businesses, accounts, and reviews.
- Automated review workflows to improve operational efficiency and reporting.

Task Planner Agent – Intelligent File Automation System (Python, Streamlit, OpenAI API, JSON)

- Developed an AI-powered task planning agent for intelligent file automation.
- Implemented persistent memory for context-aware task execution.
- Streamlined file organization and automated task scheduling through modular AI.

TrackMyFlight – Real-Time Flight Tracking Application (Flutter, Dart, REST API)

- Built a Flutter application to track real-time flight information using REST APIs.
- Displayed live flight status, schedules, and journey details through API integration.

Education

Master of Computer Applications (MCA) - Artificial Intelligence 2024 - 2026

Parul Institute of Engineering and Technology - Parul University, Vadodara, Gujarat
CGPA - 8.32/10

Bachelor of Computer Applications (BCA) - Full Stack Web Development 2021 - 2024

Parul Institute of Computer Applications - Parul University, Vadodara, Gujarat
CGPA - 8.15/10

Certifications

- Data Science Using Python – SWAYAM
- Deep Learning – Simplilearn SkillUp
- Logic Development Using Python – Parul University
